[Why]

- 1. Show you've read widely and deeply from appropriate materials & are well-informed
- 2. Provide your reader with the publication details for the original work
- 3. Give credit to the author of the original work

There are numerous citation styles:

The **three most common** styles are:

- APA style (American Psychological Association)
- MLA style (Modern Language Association)
- Chicago style (University of Chicago Press)

Citation style guides specify:

- Which publication details to include (author name, year of publication, etc.)
- 2. Order of appearance for publication details
- 3. Punctuation conventions (when to capitalize, italicize, etc.)

Broadly speaking, there are **2 parts to a citation**:

- 1. *In-text citation.* Appears in the body of your paper; points readers to the reference list.*
- 2. References (APA) | Works Cited (MLA) | Bibliography (Chicago). Appears at the end of your paper; includes full publication details.

*Note: Chicago uses footnotes/endnotes.

ABSTRACT

A large part of the literature analyzing the links between biodiversity conservation and ment assumes that nature-based tourism managed by indigenous communities will resuvation of natural resources but also in increased development. In practice, ecotourise deliver the expected benefits to indigenous communities due to a combination of factors in the endowments of human, financial and social capital within the community, lack of distribution of the economic benefits of ecotourism, and land insecurity. Based on a revie analyze the complex interaction among the factors shaping the success and failure of eco in indigenous communities, and we stress the need for a better approach to enhance the nities' livelihood possibilities coming from ecotourism, as well as to promote land tenu empowerment.

Finding publication details on **web pages** can be challenging; see <u>this web page</u>, for example:

- Check the top of the page for the title of the web page
- Check the bottom of the page for date of electronic publication/last update
- Look next to date of publication/last update for the publishing organization

Note: Sometimes websites don't provide complete publication details; include all those you can find.

Some of the library's databases will provide you with a citation for your article.
